## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-11,14,24-27 rejected under 35 U.S.C. 103(a) as being unpatentable over Slade (6631905).

Art Unit: 3711

Claims 1-9,14,25-27: Slade teaches a game having a playing surface (12) as a mat (5:53) illustrating bodily poses (13) and titles (each space 13 as shown in Fig.1, includes written information as can be seen in the figure), a plurality of cards (20) having top faces depicting bodily poses (5:51-54, 6:63-65), and a random selection device (16) having numbers and actions (6:44-53).

The only differences between applicant's invention and cited reference reside in the meaning and information conveyed by he printed matter ex. Parte Breslow 192 USPQ 431.

For example a picture of a person in standing position can be interpreted as a yoga pose.

One of ordinary skill in art at the time the invention was made would have suggested using bodily poses on game board to attract potential customers.

Claim 10: Applicant may note that a spinner is an art recognized alternative random device and used in place of other devices such as dice.

Claim 11: Random device "actions including" indicates at rules for playing and do not further limit apparatus in the claim.

3. Claim 10 rejected under 35 U.S.C. 103(a) as being unpatentable over Slade. Slade teaches all limitations except that it does not teach spinner as a random device. A spinner is an art recognized alternative random device and used in place of other devices such as dice. In order to attract potential players it would have been obvious to provide a spinner in place of dice. Spinners have the same function as dice. One of

**Art Unit: 3711** 

ordinary skill in art at the time the invention was made would have suggested using a spinner in place of dice to accomplish same function.

Page 4

- 4. Claim 11 rejected under 35 U.S.C. 103(a) as being unpatentable over Slade. Slade teaches all limitations except that it does not expressly teach device actions including as indicated by the applicant's claim. Assuming that the applicant intends print such indicia on the random device, the only difference between the cited reference and the claimed random device resides in the meaning and information conveyed by the printed matter and not considered patentable Ex. Parte Breslow 192 USPQ 431. For example combination of number indicia and the color indicia on the cited reference dice may be interpreted directing actions as claimed. One of ordinary skill in art at the time the invention was made would have suggested printing indicia for actions on random device.
- 5. Claims12-13, 24 rejected under 35 U.S.C. 103(a) as being unpatentable over Slade in view of Walker (D411919).

Slade teaches all limitations except that it does not teach a carrier for the game board. Walker teaches a carrier with a strap (Fig.4) for carrying the game board. Game boards are known to be carried by people during travel and in order to secure the game board it has been a common practice to use carriers and placing game board sin carriers. One of ordinary skill I art at the time the invention was made would have provided carriers for securing game boards.

With respect to a cylindrical configuration, such features are personnel preferences and not critical to the invention. One of ordinary skill in art would have suggested modifying the shape of the carrying bag according to their preference.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vishu K. Mendiratta whose telephone number is (571) 272-4426. The examiner can normally be reached on Mon-Fri 8AM to 5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eugene Kim can be reached on (571) 272-4463. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
